New HHS data reporting platform - Single data entry fulfills state and federal requirements. As announced to MHA member CEOs this week, MHA has purchased a new HHS Data Reporting Platform with COVID-19 grant funding. This creates a single, secure data entry point to fulfill both state and federal requirements, including state PPE resource allocation and HHS Teletracking mandates. This new single-entry system is especially critical with CMS' new rules that require such reporting as a Condition of Participation for Medicare and Medicaid. Hospitals will face possible termination of Medicare and Medicaid

payments if unable to correct reporting deficiencies. See the complete details on the new platform [here](#).

Beginning September 8, 2020 hospitals should utilize EMResource for statewide bed availability, PPE and Remdisivir data, as well as, all TeleTracking data points, including HHS lab testing. Upon entering HHS data into EMResource, Juvare will automatically upload data to TeleTracking on behalf of your facility daily. Facilities may continue entering their own data into TeleTracking if they choose. All laboratories conducting COVID-19 testing and reporting patient-specific results – including hospital labs, nursing homes, and other facilities conducting testing for COVID-19 – will be required to comply. If a laboratory does not report the required information, CMS will impose a civil monetary penalty in the amount of \$1,000 a day for the first day, and \$500 for each subsequent day.

- Long-Term Care Facilities: Bed and PPE counts to be reported weekly on Fridays. Use this [survey link](#) weekly to report bed and PPE data.
