<b>SD</b>	<b>28,564</b>

## OPERATIONS

**NIH launches clinical trial for hospital patients, antibody research network.** NIH has [launched](#) a global clinical trial to test a potential COVID-19 treatment that combines remdesivir with a highly concentrated antibody solution. The agency also [announced](#) a research network to study the immune response to COVID-19 and increase antibody testing capacity.

**CDC: Addressing transmission among young adults an urgent priority.** Among 767 hotspot counties for COVID-19 in June and July, early increases in the rate of positive tests for individuals under age 25 were followed by several weeks of rising positivity rates in older age groups, the CDC [reported](#) Friday. “Addressing transmission among young adults is an urgent public health priority,” the authors said, noting that an increase in positive test results in older age groups “is likely to result in more hospitalizations, severe illnesses, and deaths.”

## PLANNING

**New HHS data reporting platform - Single data entry fulfills state and federal requirements.** MHA has purchased a new HHS Data Reporting Platform with COVID-19 grant funding. This creates a single, secure data entry point to fulfill both state and federal requirements, including state PPE resource allocation and HHS Teletracking mandates. This new single-entry system is especially critical with

CMS' new rules that require such reporting as a Condition of Participation for Medicare and Medicaid. Hospitals will face possible termination of Medicare and Medicaid payments if unable to correct reporting deficiencies. See the complete details on the new platform [here](#).

**As of September 8, 2020 hospitals should utilize EMResource for statewide bed availability, PPE and Remdisivir data, as well as, all TeleTracking data points, including HHS lab testing.** Upon entering HHS data into EMResource, Juvare will automatically upload data to TeleTracking on behalf of your facility daily. Facilities may continue entering their own data into TeleTracking if they choose. All laboratories conducting COVID-19 testing and reporting patient-specific results – including hospital labs, nursing homes, and other facilities conducting testing for COVID-19 – will be required to comply. If a laboratory does not report the required information, CMS will impose a civil monetary penalty in the amount of \$1,000 a day for the first day, and \$500 for each subsequent day.

**Long-Term Care facilities must transition all PPE and bed reporting to EMResources as of October 1, 2020.** The previous [weekly survey](#) hosted on Formstack will become inactive on October 1, 2020. Facilities that do not have access to EMResource should email contact information to [hppcoordinators@mtha.org](mailto:hppcoordinators@mtha.org).

For questions, please contact your [Regional Coordinator](#).

## LOGISTICS

**Submit PPE needs to DES coordinator in order to ensure allocation.** Until further notice, healthcare organizations MUST [submit needs to their local DES coordinator](#) in order to receive an allocation of emergency PPE.

## COMMUNICATIONS

**Call recordings and webinar playbacks.** Missed a call or webinar promoted in MHA's daily COVID-19 Call & Webinar Alert? Many are recorded, and are [posted here](#) once available.

**COVID-19 Resource Library.** MHA has built a [library](#) of helpful resources and sample material from other hospitals, healthcare organizations and states in their response to COVID-19.

**HHS hospital-specific COVID-19 questions:** [HospitalCOVID19@hhs.gov](mailto:HospitalCOVID19@hhs.gov)

**SITREP Archive.** Daily Situation Reports archived [here](#).

**State of Montana COVID-19 Hotline: 1-888-333-0461**

Montanans can also email questions to [covid19info@mt.gov](mailto:covid19info@mt.gov). State public health officials will be responding to inquiries from 8 a.m. to 5 p.m. Monday to Friday.

**MHA Incident Management Team:** [esf8@mtha.org](mailto:esf8@mtha.org)
