OPERATIONS

Updated analysis of COVID-19 cases in Montana. Montana DPHHS has released an updated epidemiological review of COVID-19 cases in the state. The [report](#) is based on COVID-19 case information available as of October 16.

CDC studies look at impact of COVID-19 on U.S. mortality, VHA hospital patients.

A CDC [study](#) released Tuesday estimates 299,028 more deaths than expected occurred in the US between Jan. 26 and Oct. 3, with 66% attributed to COVID-19. A second CDC [study](#) looks at Veteran's Health Administration patients hospitalized with COVID-19, who were five times more likely to die than those hospitalized with flu and twice as likely to be admitted to an ICU.

PLANNING

HHS hosts data reporting webinar for hospitals and other stakeholders. HHS's Office of Intergovernmental and External Affairs will be hosting a webinar for hospitals and other stakeholders with Administration subject matter experts to detail the new [guidance](#) announced earlier this month and the CMS [reinforcement process](#). HHS will be hosting several identical webinars. The first two webinars are scheduled for today, [Tuesday October 20](#) at 2:00pm MT and [Thursday, October 22](#) at 11:00am MT. Please register prior to the presentation.

HHS data reporting platform - Single data entry fulfills state and federal requirements. MHA has purchased a new HHS Data Reporting Platform with COVID-19 grant funding. This creates a single, secure data entry point to fulfill both state and federal requirements, including state PPE resource allocation and HHS Teletracking mandates. This single-entry system is especially critical with CMS' rules that require such reporting as a Condition of Participation for Medicare and Medicaid. Hospitals will face possible termination of Medicare and Medicaid payments if unable to correct reporting deficiencies. See the complete details on the new platform [here](#).

As of September 8, 2020 hospitals should utilize EMResource for statewide bed availability, PPE and Remdisivir data, as well as, all TeleTracking data points, including HHS lab testing. Upon entering HHS data into EMResource, Juvare will automatically upload data to TeleTracking on behalf of your facility daily. Facilities may continue entering their own data into TeleTracking if they choose. All laboratories conducting COVID-19 testing and reporting patient-specific results – including hospital labs, nursing homes, and other facilities conducting testing for COVID-19 – will be required to comply. If a laboratory does not report the required information, CMS will impose a civil monetary penalty in the amount of \$1,000 a day for the first day, and \$500 for each subsequent day.

As of October 1, 2020 long-term care facilities must report all PPE and bed reporting to EMResources. The previous weekly is inactive on October 1, 2020. Facilities that need assistance should email hppcoordinators@mtha.org.

For questions, please contact your [Regional Coordinator](#).

LOGISTICS

Submit PPE needs to DES coordinator in order to ensure allocation. Until further notice, healthcare organizations MUST [submit needs to their local DES coordinator](#) in order to receive an allocation of emergency PPE.

COMMUNICATIONS

Call recordings and webinar playbacks. Missed a call or webinar promoted in MHA's daily COVID-19 Call & Webinar Alert? Many are recorded, and are [posted here](#) once available.

COVID-19 Resource Library. MHA has built a [library](#) of helpful resources and sample material from other hospitals, healthcare organizations and states in their response to COVID-19.

HHS hospital-specific COVID-19 questions: HospitalCOVID19@hhs.gov

SITREP Archive. Daily Situation Reports archived [here](#).

State of Montana COVID-19 Hotline: 1-888-333-0461

Montanans can also email questions to covid19info@mt.gov. State public health officials will be responding to inquiries from 8 a.m. to 5 p.m. Monday to Friday.

MHA Incident Management Team: esf8@mtha.org
