**President-elect Biden announces COVID-19 Advisory Board.** President-elect Biden on Monday [announced](#) the Transition COVID-19 Advisory Board, a team of leading public health experts to advise him, Vice President-elect Kamala Harris, and the Transition’s COVID-19 staff. David Kessler, M.D., a former FDA commissioner and a current professor at University of California San Francisco; Vivek Murthy, M.D., former Surgeon General under President Obama and Trump; and Marcella Nunez-Smith, M.D., associate dean for health equity research at Yale School of Medicine; will co-lead the Advisory Board.

## OPERATIONS

**Pfizer reports 90% efficacy for COVID-19 vaccine candidate.** Pfizer Inc. on Monday [announced](#) that its mRNA-based vaccine candidate is more than 90% effective in preventing COVID-19, based on early data that has yet to be peer-reviewed. The candidate is in its phase 3 clinical study. Pfizer said it enrolled 43,538 participants in the trial, observing no serious safety concerns. While the Pfizer candidate is not part of the federal government’s Operation Warp Speed, the drug maker says that it intends to produce globally up to 50 million doses of the vaccine in 2020 and up to 1.3 billion doses in 2021.

**FDA authorizes first test to detect neutralizing antibodies from prior infection.** The FDA Friday issued an [emergency use authorization](#) for the first serology test

to identify individuals with neutralizing antibodies from recent or prior infection with the virus that causes COVID-19. Neutralizing antibodies have reduced the infection of cells in a laboratory setting, but researchers are still studying their effect in humans. FDA previously has issued EUAs for serology tests that detect binding antibodies, which do not necessarily reduce cell infection.

## PLANNING

**HHS data reporting platform - Single data entry fulfills state and federal requirements.** MHA has purchased a new HHS Data Reporting Platform with COVID-19 grant funding. This creates a single, secure data entry point to fulfill both state and federal requirements, including state PPE resource allocation and HHS Teletracking mandates. This single-entry system is especially critical with CMS' rules that require such reporting as a Condition of Participation for Medicare and Medicaid. Hospitals will face possible termination of Medicare and Medicaid payments if unable to correct reporting deficiencies. See the complete details on the new platform [here](#).

**As of September 8, 2020 hospitals should utilize EMResource for statewide bed availability, PPE and Remdisivir data, as well as, all TeleTracking data points, including HHS lab testing.** Upon entering HHS data into EMResource, Juvare will automatically upload data to TeleTracking on behalf of your facility daily. Facilities may continue entering their own data into TeleTracking if they choose. All laboratories conducting COVID-19 testing and reporting patient-specific results – including hospital labs, nursing homes, and other facilities conducting testing for COVID-19 – will be required to comply. If a laboratory does not report the required information, CMS will impose a civil monetary penalty in the amount of \$1,000 a day for the first day, and \$500 for each subsequent day.

**As of October 1, 2020 long-term care facilities must report all PPE and bed reporting to EMResources.** The previous weekly is inactive on October 1, 2020. Facilities that need assistance should email [hppcoordinators@mtha.org](mailto:hppcoordinators@mtha.org).

For questions, please contact your [Regional Coordinator](#).

## LOGISTICS

**1 in 11 COVID-19 hospital patients readmitted, study finds.** In a study of 106,543 patients hospitalized for COVID-19 between March and July, 9% were readmitted

to the same hospital within two months of discharge, the CDC [reported](#) Monday. Risk factors for readmission included age 65 or older, certain chronic conditions, hospitalization in the preceding three months, and discharge to a skilled nursing facility or home healthcare. “With the recent increases in cases nationwide, hospital planning can account for these increasing numbers along with the potential for at least 9% of patients to be readmitted, requiring additional beds and resources,” the authors said.

**Submit PPE needs to DES coordinator in order to ensure allocation.** Until further notice, healthcare organizations MUST [submit needs to their local DES coordinator](#) in order to receive an allocation of emergency PPE.

## COMMUNICATIONS

**Call recordings and webinar playbacks.** Missed a call or webinar promoted in MHA’s daily COVID-19 Call & Webinar Alert? Many are recorded, and are [posted here](#) once available.

**COVID-19 Resource Library.** MHA has built a [library](#) of helpful resources and sample material from other hospitals, healthcare organizations and states in their response to COVID-19.

**HHS hospital-specific COVID-19 questions:** [HospitalCOVID19@hhs.gov](mailto:HospitalCOVID19@hhs.gov)

**SITREP Archive.** Daily Situation Reports archived [here](#).

**State of Montana COVID-19 Hotline: 1-888-333-0461**

Montanans can also email questions to [covid19info@mt.gov](mailto:covid19info@mt.gov). State public health officials will be responding to inquiries from 8 a.m. to 5 p.m. Monday to Friday.
