OPERATIONS

SARS-CoV-2 viral mutation prompts FDA alert for healthcare provider, clinical laboratory staff. The FDA on Friday, Dec. 8 [alerted clinical laboratories](#) and healthcare providers of its ongoing effort to monitor the potential molecular test impact resulting from SARS-CoV-2 mutations, including the B.1.1.7 variant that has emerged from the United Kingdom. FDA said the risk that these mutations will impact overall testing accuracy is low. Nevertheless, the agency is working

with authorized test developers and reviewing incoming data to ensure that healthcare providers and clinical staff can quickly and accurately diagnose patients infected with SARS-CoV-2, including those with emerging genetic variants. The agency said that available data suggest that the two currently authorized COVID-19 vaccines may still be effective against mutated strains, including B.1.1.7., and will continue to keep healthcare providers and the public informed of any new information as it becomes available.

PLANNING

HHS issues updated COVID-19 data reporting guidance. HHS on Nov. 9 updated its [guidance to hospitals](#) on the reporting of COVID-19-related data. The guidance includes two key changes stemming from the CMS' Dec. 2 [interim final rule](#) expanding the requirement for hospitals to report COVID-19 data. Influenza data fields will be mandatory starting on Friday, December 18. Therapeutic data fields are now mandatory beginning today, January 8.

HHS data reporting platform - Single data entry fulfills state and federal requirements. MHA has purchased a new HHS Data Reporting Platform with COVID-19 grant funding. This creates a single, secure data entry point to fulfill both state and federal requirements, including state PPE resource allocation and HHS Teletracking mandates. This single-entry system is especially critical with CMS' rules that require such reporting as a Condition of Participation for Medicare and Medicaid. Hospitals will face possible termination of Medicare and Medicaid payments if unable to correct reporting deficiencies. See the complete details on the new platform [here](#).

As of September 8, 2020 hospitals should utilize EMResource for statewide bed availability, PPE and Remdisivir data, as well as, all TeleTracking data points, including HHS lab testing. Upon entering HHS data into EMResource, Juvare will automatically upload data to TeleTracking on behalf of your facility daily. Facilities may continue entering their own data into TeleTracking if they choose. All laboratories conducting COVID-19 testing and reporting patient-specific results – including hospital labs, nursing homes, and other facilities conducting testing for COVID-19 – will be required to comply. If a laboratory does not report the required information, CMS will impose a civil monetary penalty in the amount of \$1,000 a day for the first day, and \$500 for each subsequent day.

As of October 1, 2020 long-term care facilities must report all PPE and bed reporting to EMResources. The previous weekly is inactive on October 1, 2020. Facilities that need assistance should email hppcoordinators@mtha.org.

For questions, please contact your [Regional Coordinator](#).

LOGISTICS

Submit PPE needs to DES coordinator in order to ensure allocation. Until further notice, healthcare organizations MUST [submit needs to their local DES coordinator](#) in order to receive an allocation of emergency PPE.

FINANCE AND ADMINISTRATION

HHS Secretary discusses public health, COVID-19 at forum for hospitals. HHS Secretary Alex Azar on Friday, Dec. 8 discussed public health issues, including the COVID-19 pandemic and vaccination efforts, during a virtual forum moderated by AHA Executive Vice President Tom Nickels. A replay of the event should be available soon on the [HHS YouTube website](#).

COMMUNICATIONS

CDC updates COVID-19 Vaccination Communication Toolkit. The CDC recently updated its [COVID-19 Vaccination Communication Toolkit](#) for medical centers, clinics, and clinicians. Resources include social media resources, videos and FAQs as well as other digital and print resources.

Call recordings and webinar playbacks. Missed a call or webinar promoted in MHA's daily COVID-19 Call & Webinar Alert? Many are recorded, and are [posted here](#) once available.

COVID-19 Resource Library. MHA has built a [library](#) of helpful resources and sample material from other hospitals, healthcare organizations and states in their response to COVID-19.

HHS hospital-specific COVID-19 questions: HospitalCOVID19@hhs.gov

SITREP Archive. Daily Situation Reports archived [here](#).

State of Montana COVID-19 Hotline: 1-888-333-0461

Montanans can also email questions to covid19info@mt.gov. State public health officials will be responding to inquiries from 8 a.m. to 5 p.m. Monday to Friday.

MHA Incident Management Team: esf8@mtha.org
