Construction Services Portfolio: Building the Future of Healthcare

Construction and renovation are among the most complex, costly projects a facility will undertake. An enormous investment is required in planning the space, purchasing the materials, and coordinating the work of architects and contractors.

Healthcare facilities rarely embark on entire projects without outside assistance. Some choose to approach such projects piecemeal, while others tackle them all at once. Some engage the services of outside firms, while others plan and coordinate themselves.

Whatever your approach, Premier has a full array of suppliers and contracts to help you complete your construction project in the most cost-effective manner. Our construction portfolio consists of more than 30 product and service categories representing over 115 nationally recognized manufacturers, distributors, and service providers. The contracts cover virtually every conceivable category – from mechanical, electrical, and plumbing to furniture and fixtures.

In addition to an industry-leading construction portfolio, Premier also offers a range of additional resources, from equipment sourcing to project management and more, that can help you complete your construction project on-time and on-budget.

Save money on your next construction project by visiting <http://bit.ly/2Je1HUY> to register!
